## PURE DRIED PERFECTION

*Over 40 years of experience*

### Where passion meets perfection

Step into the world of Lamboo Dried & Deco, where passion and craftsmanship come together in every dried creation. With over 40 years of expertise, we cultivate and craft the finest, most authentic dried flowers and decorative products. From seed to final dried concept, we control every step of the process to ensure exceptional quality. Based in the heart of the European flower industry - the Dutch Bulb Region (The Flower Strip) - we stand as a symbol of the Netherlands' horticultural excellence.

### Sustainable elegance with a low CO<sub>2</sub> footprint

Lamboo's dried flowers offer a beautiful and responsible choice. Thanks to their minimal environmental impact and long vase life, our dried flowers are a responsible and stylish solution. Naturally grown, long-lasting, and with an ultra-low CO<sub>2</sub> footprint, they embody sustainability at its best. Our innovative Dried Flower Based Paper, made from our own flower residue, and our biodegradable packaging solutions further reinforce our commitment to sustainability. We take eco-consciousness seriously, using water-

based, non-toxic dyes and paints, powering our facility with 360 solar panels, and minimizing waste through smart recycling initiatives.

### Stay inspired with innovative designs

Our design team continuously develops new bouquets, arrangements, and concepts that inspire retailers, florists, and wholesalers. Our integrated facility brings together every step of the process - from drying and dyeing to innovation and bouquet creation - making us a true center of excellence in dried flowers.

### Special theme collections

In addition to our year-round collection, we offer exclusive seasonal themes such as Love, Spring, Autumn, and Christmas - each designed to bring a fresh, contemporary touch to any setting. Stay inspired with our latest designs by reaching out to our sales team.

### CHARACTERISTICS OF OUR DRIED PRODUCTS

- NATURAL
- HANDMADE
- QUALITY
- SUSTAINABLE

## 100% Dutch

Look for the NL logo to identify local  
Dutch dried flowers in our range.

# FROM SEED TO DRIED CONCEPT

At Lamboo Dried & Deco, quality begins in spring, with the careful selection of seeds. By summer, flowers are hand-harvested at their peak and brought to our facility in Lisse.

Our unique drying process preserves both vibrant colours and natural shapes, ensuring long-lasting beauty. Each stem is manually graded for consistent quality before being packed in eco-friendly, biodegradable materials.

From field to final dried concept, every step reflects our passion, expertise, and commitment to sustainability.

Experience the Dutch Journey:

Spring Sowing

Picture vibrant Dutch dried flowers planted in the spring, soaking up the sun and growing until they reach their prime in the summer.

Harvest Mastery

Our expert harvesters use time-honoured techniques, wielding hand, knife, and sickle to delicately gather each flower at its peak. It's a skilful touch that only human hands can provide.

Careful Drying and Packing

Post-harvest, the flowers enter our specialized processing rooms. Here, they are meticulously dried to preserve their beauty. Finally, these exquisite blooms are lovingly wrapped into our Dried Flower Based Paper and packed into recyclable boxes, ready to bring joy to any space.

# Let's talk colour!

Our products shine in their natural shades, which are fully dried or even more vibrant thanks to our unique drying process. In addition, we offer a range of dyed options. This opens the door for designers and craftsmen to achieve even more extraordinary creations.

Discover our paint palette of no less than 18 stunning colours below. The majority of the items on this page are available in each of these colours. For the remaining products, we have carefully selected colour options. The full overview can be found in this catalogue from page 42 onwards.

Teak (338)

Pink (052)

Yellow (032)

Red (062)

## 02. Coloured Dried Flowers

### Expert Paints & Dyes

Our expertise in colour spans 40 years. Explore the possibilities with non-toxic, water-based dyes and paints. Crafted by experts, our colour ranges are regularly updated for a consistent finish and enhanced product lifespan. A lighter base creates a more vibrant colour than the same colouring on a darker base. All paints and dyes are certified, with data sheets also available on request. Our wastewater is cleaned in our on-site water purification plant and is regularly inspected. Keep in mind that certain painted items might experience some color bleeding.

# Wide range of colours

Besides the natural colours of our products, we also offer a wide range of coloured items. This gives us even more options, diversity and room for creativity.

## 03. Bleached white

Bleached white flowers and products bring timeless elegance to bouquets, offering a clean and sophisticated look suitable for various occasions. The bleaching process removes natural pigments and retains the original hues of flowers, resulting in subtle variations in colour. This diversity adds depth and visual interest to arrangements.

Bleached white products stand out for their simple yet captivating beauty, making them a great choice for dried concepts and bouquets. Whether used alone or combined with other blooms, bleached products add a touch of sophistication to any event or space.

## 06. Preserved

The preserved products have undergone a preservation process to maintain their beauty and freshness. Preservation is also a form of drying, although the result is different. The preservation technique allows flowers to maintain a completely natural appearance and feel, as if they were freshly-cut flowers. ⚠ *Beware Preserved products may bleed and give off colour when exposed to temperature changes.*

# Preserved Beauty

Discover our preserved process, where flowers undergo rehydration with a mixture of glycerine and plant elements. The result is a vibrant and ready-to-use product.

Quantity 10 pc

Preserved Process

1  
The product undergoes a rehydration process by being placed in a mixture made of glycerine and other plant elements.

2  
This liquid slowly rises through the stem until it completely replaces the juice.

3  
After a few days, the process is complete and the product is ready to be used.

## 08. Packaging

### Packaging with Purpose – Dried Flower Based Paper

We prioritize the environment in our packaging choices, using recycled cardboard boxes, paper tape, and offering various eco-friendly options. In the summer of 2023 we proudly introduced our ***Dried Flower Based Paper, made from our own dried flower residue.*** We are the first company to do this and are very proud of this circular solution. It is, since then, our new sustainable standard.

Our bunches are packed into recycled cardboard boxes without extra wrap or plastic and are then sealed with paper tape. When packaging is required for individual bunches or bouquets we offer our Dried Flower Based Paper as our standard.

Also, the following options are available on request: kraft paper, transparent sleeves, a mix of kraft and window sleeve. Paper tape is also used to secure the bunches in the sleeve.

## Packaging

We offer different kinds of packaging. From wrapping in our dried flower based paper till small and bulk packing.

Please contact our account managers for the possibilities: +31 252 213 109 or [info@lamboodrieddeco.com](mailto:info@lamboodrieddeco.com)

## 09. Point of Sale Material

For our premium customers, we facilitate Point of Sale material for the shop floor. In this way, our customers can contribute to strengthening the Unique Selling Points of our products and propagating the values of Lamboo Dried & Deco. It also creates a professional image and underlines the quality, craftsmanship and durability of our products. POS materials are available in various designs, formats, applications and languages. Ask your account manager for more information and conditions.
